## Personal Profile

---

**Past:** In my previous roles as a fashion designer and sales advisor at various establishments, I worked closely with cross-functional teams, such as pattern-cutting, visual merchandising and marketing. Demonstrating attention to detail, communication skills and ability to work under pressure allowed me to consistently deliver high-quality service within tight deadlines.

**Present:** Possessing a keen passion for design and front-end development, I decided to join a software development bootcamp to become proficient in coding. I chose this program for its strong foundation and dynamic environment it provides.

**Future:** I wish to enhance my knowledge in the field of software development by putting my skills to practice. By acquiring more experience I will advance my career in development and grow both personally and professionally.

## Interests and Achievements

---

**Computing:** I enjoy the creative aspect of computing, such as designing layouts for websites, for friends magazines. I spend a lot of time editing photos on Photoshop and exploring different ways to capture the best shots. By exploring website layouts I have developed an interest in how these websites are made from scratch.

**Hobbies:** Photography, music, travel, art events and films.

**Additional Info:** References available upon request.
